

Evaporator Coil with Puron® Refrigerant

SLAB COIL MODEL CSPHP

Now available with *DuraCoat™*

Preferred™
SERIES

The Preferred Match for

The Right Fit Since 1904

When your family needs year-round comfort from one value-packed system, it's good to know you've put your trust in Bryant®. Bryant has been North America's perfect fit for home comfort since 1904. We've built a solid reputation by delivering on our promise of comfort, reliability and value. Today, as consumer demand for quality and performance continues to rise, Bryant responds with products like the Model CSPHP with Puron® refrigerant and Model CSRHP Evaporator Coils.

These Bryant evaporator coils are designed to help your heat pump or air conditioner offer the high efficiency ratings you expect. The Model CSPHP is designed for use with environmentally sound Puron refrigerant. And, both of these products are designed, built and

backed by the most reliable source for comfort and installed by your trusted local Bryant dealer. No matter which suits your needs, you can be sure it's an excellent choice for reliable, efficient comfort you can trust.

Designed to Match Your System

A Preferred™ Series evaporator coil is a great fit for your Bryant air conditioner or heat pump because it comes from the same dedicated development team that has made ALL of our products so reliable. Because it's designed to match, it fits better and optimizes the performance of your air conditioner or heat

pump system. And because it includes a factory installed TXV to precisely control refrigerant flow, you should always have the best combination of comfort and energy efficiency as well as the reliability that comes with optimized system performance.

Enjoy Better Quality Indoor Air

The temperature of the air in your home is only one component to your overall comfort. You also deserve enhanced indoor air quality. That's the benefit of choosing a Preferred™ Series evaporator coil. This evaporator coil is mounted on Bryant's high-tech composite base pan that doesn't rust and is designed for

optimum drainage. By minimizing moisture build-up, this base pan virtually eliminates a potential source for mold and bacteria growth. And, to facilitate even greater indoor air quality, the cabinet is designed for quick and easy installation of our UV Lights.

Your Comfort System.

Warranty

To the original owner, the Bryant model CSPHP evaporator coil is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties, which may include labor.

* Warranty period is 5 years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts limited warranty. See warranty certificate at bryant.com for complete details.

Performance

The Environmentally Sound Choice

The Model CSPHP uses environmentally sound Puron® refrigerant. That's an important consideration because Freon®-22*, the refrigerant most commonly used in evaporator coils, is gradually being phased out of existence due to concern over the Earth's ozone layer. Bryant successfully introduced products with Puron refrigerant in 1996, and those products are now the most reliable in our entire portfolio. By choosing the Model CSPHP with Puron now, you are helping preserve the ozone layer while selecting a product known for its lasting reliability.

* The registered owner of Freon is E.I. DuPont de Nemour &

DuraCoat™ Protection for Peace of Mind

Premature indoor coil corrosion affects many home comfort systems. To combat this potential problem, Bryant offers optional DuraCoat™ protection. DuraCoat provides a tin plating of the indoor coil's copper hairpins. This creates a barrier between the corrosion-causing elements and the coil. No other manufacturer in the industry presently has an acceptable solution for this specific indoor coil corrosion issue, making Bryant the choice for worry-free comfort.

Indoor Comfort Made Reliable

- 1 ENVIRONMENTALLY SOUND, ENERGY-EFFICIENT**
The Model CSPHP is designed for use with Puron® refrigerant to provide years of environmentally sound, trouble-free performance.
- 2 ENHANCED COMFORT**
Our Thermostatic Expansion Valve (TXV) ensures proper refrigerant flow during fluctuating pressures and conditions for top reliability and energy-efficient operation.
- 3 DURABILITY AND DRAINAGE**
The base pan is made of a high-tech, corrosion-free composite material. Integrated sloped drainage helps reduce build-up of mold, bacteria and other airborne pollutants.
- 4 LASTING LOOKS AND PERFORMANCE**
The sturdy, 22-gage cabinet is painted to match your Bryant furnace or fan coil and to provide years of scratch-resistant good looks.
- 5 LONGER LIFE**
Some models offer DuraCoat™, a special tin plating of the coil to reduce the threat of formicary corrosion.
